How to use the tables to find your monthly payment

Find your basic rate

Go to the SMC rate that applies to you. On the **Basic SMC** rates table, find the amount for your disability rating and SMC letter designation. This is your monthly basic rate.

Example (Veteran with no children): If you were a Veteran with a dependent spouse (no dependent parents or children), and you had an SMC-M designation, your monthly basic rate would be **\$5,628.14** each month.

Find your added amounts, if any apply

If your spouse receives Aid and Attendance benefits or you have more than 1 child, you may qualify for additional monthly payment amounts as listed in the **Added amounts** table.

[Learn more about Aid and Attendance benefits](https://www.va.gov/pension/aid-attendance-housebound)
(<https://www.va.gov/pension/aid-attendance-housebound>).

First, determine your basic rate.

Example (Veteran with children): If you're a Veteran with an SMC-L designation, and you have 4 dependent children (1 child over age 18 in a qualifying school program and 3 children under age 18), and a dependent spouse, you would start with a basic SMC rate of **\$5,281.24** for a Veteran with 1 child and spouse (no parents).

Next, look at the **Added amounts** table. Find the amount for children under age 18 (**\$109.11**).

Since your basic rate already provides payment for 1 child, you would add the rate of **\$109.11** for each additional child under age 18 (so **\$109.11** x 2).

Then, look for the rate for each additional child over 18 in a qualifying school program (**\$352.45**).

If your spouse receives Aid and Attendance, you would also add **\$201.41** (which is the added amount for a spouse receiving Aid and Attendance, for a Veteran with an SMC-L designation).

Add these amounts to your basic rate to get your total monthly payment amount.

In our example of a Veteran with an SMC-L designation, your total monthly payment amount would be:

\$5,281.24 (basic rate (1 spouse, 1 child))
+ 109.11 (second child under 18)
+ 109.11 (third child under 18)
+ 352.45 (1 child over 18, in a qualifying school program)
+ 201.41 (spouse who receives Aid and Attendance)
Total: \$6,053.32

How we assign SMC levels L through O

We assign SMC levels based on very specific situations and combinations of situations, including:

- The amputation of 1 or more limbs or extremities
- The loss of use of 1 or more limbs or extremities (meaning you have no effective function remaining)
- The physical loss of 1 or both eyes
- The loss of sight or total blindness in 1 or both eyes
- Being permanently bedridden (unable to get out of bed)
- Needing daily help with basic needs (like eating, dressing, and bathing), also called “Aid and Attendance”

Select an SMC letter below to learn more about the specific situations and combinations of situations that fall within that designation.
